The bill represents an important opportunity to make the Mescalero hatchery support needs known. Also, John Berry, Exec. Director of NFWF, indicates \$150K may be coming from NFWF in the future. Butch emphasized the momentum of support for SWTFC, and expects this will continue to expand.

- **Approval of past minutes (Steve Whiteman)**

Steve presented the minutes from the previous SWTFC meeting held in Laguna, NM. A motion to approve the minutes was made by Paul Holmes and seconded by Freddie Chino. The vote was taken and there was unanimous approval of the June 15 minutes.

*(Note: John Antonio had previously submitted a recommended edit to the June 15 minutes concerning the reported number of TLIP and TWG grants submitted by the southwest region (28, not 14). Also, Paul Holmes suggested strengthening the language used to describe the level of Tribal concern on a possible merger of FWS Fisheries Program into FWS Ecological Services. The statement, "ES focus on ESA issues, and frequent lack of recognition of tribal sovereign authority, would be a major issue" was inserted. The requested changes were incorporated into the approved minutes.)*

- **Clarification of Fisheries Program Facility Changes (Lynn Starnes)**

A plan was made to re-locate federal facilities to federal lands for rent savings, where feasible

The FWS AZFRO and NMFRO have been under consideration for re-location

The Plan: Pinetop Fish Health Center will move to Dexter

Re-location to Dexter would greatly improve efficiency for Region, Also advantageous to MTFH
